## About me

I am a motivated and creative second-year Software Engineering student at CamTech University with strong skills in programming, design, and project management. Alongside my studies, I have over one years of experience in electronic device repair at BIS School, specializing in fixing laptops, computers, and power supplies. As an active member of The GRIT Project, I enjoy solving problems, collaborating in teams, and developing innovative ideas that combine technology and sustainable development.

## Education

## Achievements

### ASEAN-China-India Youth Leadership Summit

2025

#### Top 10 Finalist

Introduced the *Eco-Blend* prototype addressing SDGs 11 & 13 through sustainable innovation.

### Generation Future 2025 (UNICEF Cambodia & Impact Hub Phnom Penh)

2025

#### Volunteer

- Supported program activities including workshops, bootcamps, and community events.
- Assisted participants and facilitators in organizing innovation and leadership sessions.
- Contributed to promoting youth engagement and social innovation initiatives.

### Egen Competition

2025 - 2026

#### Top 10 Finalist

Introduced the IFARM prototype of the smart IOT system for counting and sorting farm animals

## **Khmer Enterprise Competition**

2025 - 2026

### [Top 10 Finalists](#)

Presenting Booxie, a mobile application that enables users to buy and sell second-hand books on a single platform.

# Project

---

## **Blue Carbon Initiative**

2025

### [Co-Youth Led](#)

Facilitated youth workshops on mangrove conservation and climate education at Kampot and Kep.

## **Booxie**

2025 - 2026

### [Technical Team](#)

As a UX/UI Designer, I used Figma to design the user interface and user experience, including wireframes and high fidelity prototypes, to create a simple application for students. I also used Google AI Studio for vibe coding to build and test the application.

## **KimiBox**

2025 - 2027

### [UI/UX Design Team](#)

Designed an interactive educational game to help students learn chemistry through engaging gameplay. The game focuses on visual and interactive learning to make chemistry easier and more enjoyable for middle and high school students..
